# WLEM APP
WASTE LESS EAT MORE

WLEM is an android app which provides food recipes for leftover products and basic items , so that we won't have to waste a lot of food items, instead we can make interesting food out of them.

This android application also provides an additional feature ,which is option of viewing the app in the user's desired language(as of now , three languages :kannada,hindi,malayalam have been provided)
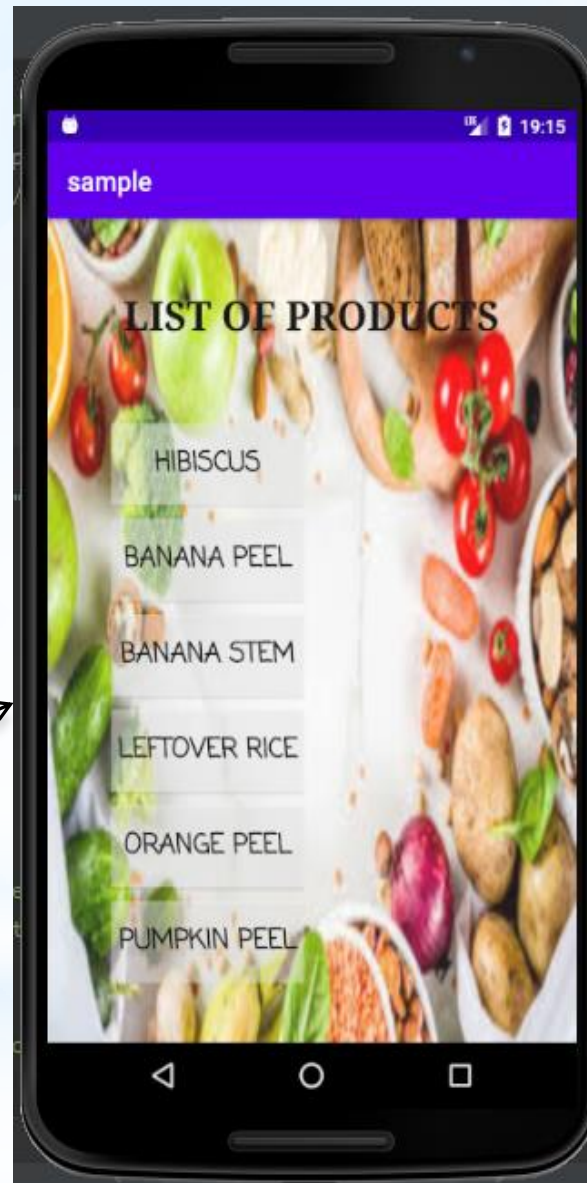

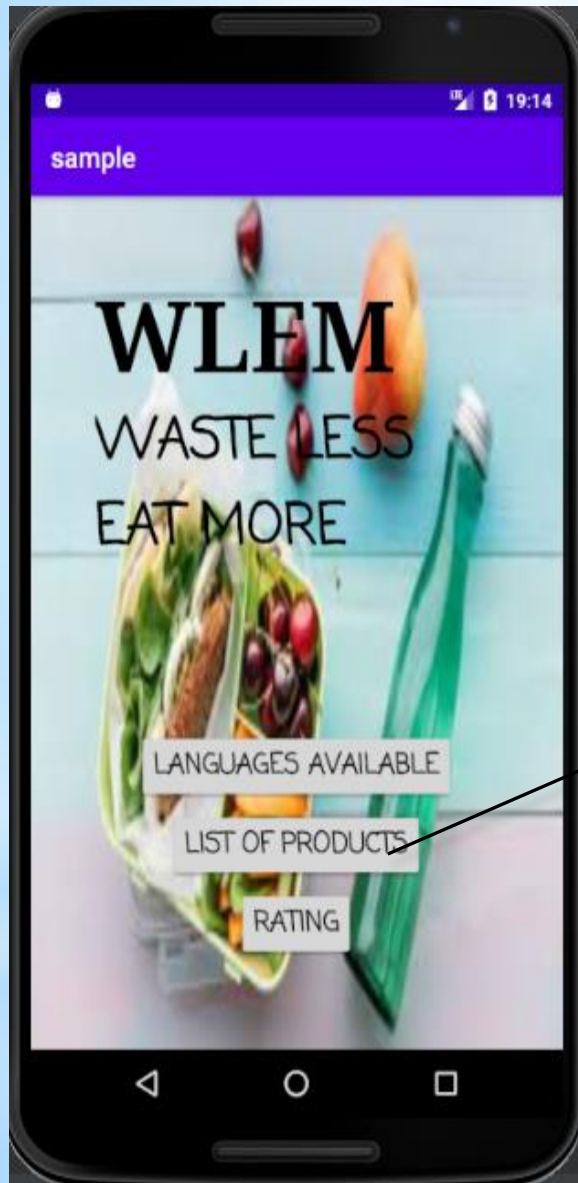

On clicking the button "LANGUAGES AVAILABLE" , we get directed to the new page. The new page provides the list of languages in which the app can be viewed and it also provides instructions as to how to change the settings to our desired language.
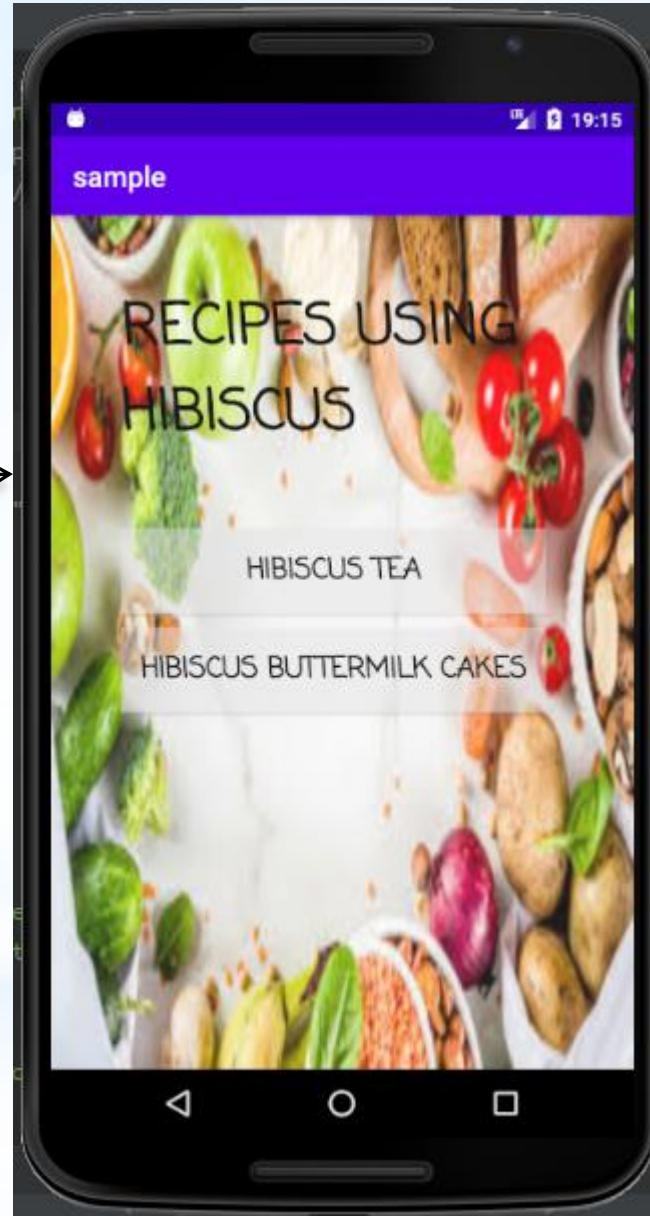

HOW TO CHANGE THE PHONE SETTINGS TO DESIRED LANGUAGE

So change the "language and input" settings to the desired language (here, hindi is chosen) and view the app in your desired language, as shown in the above images.
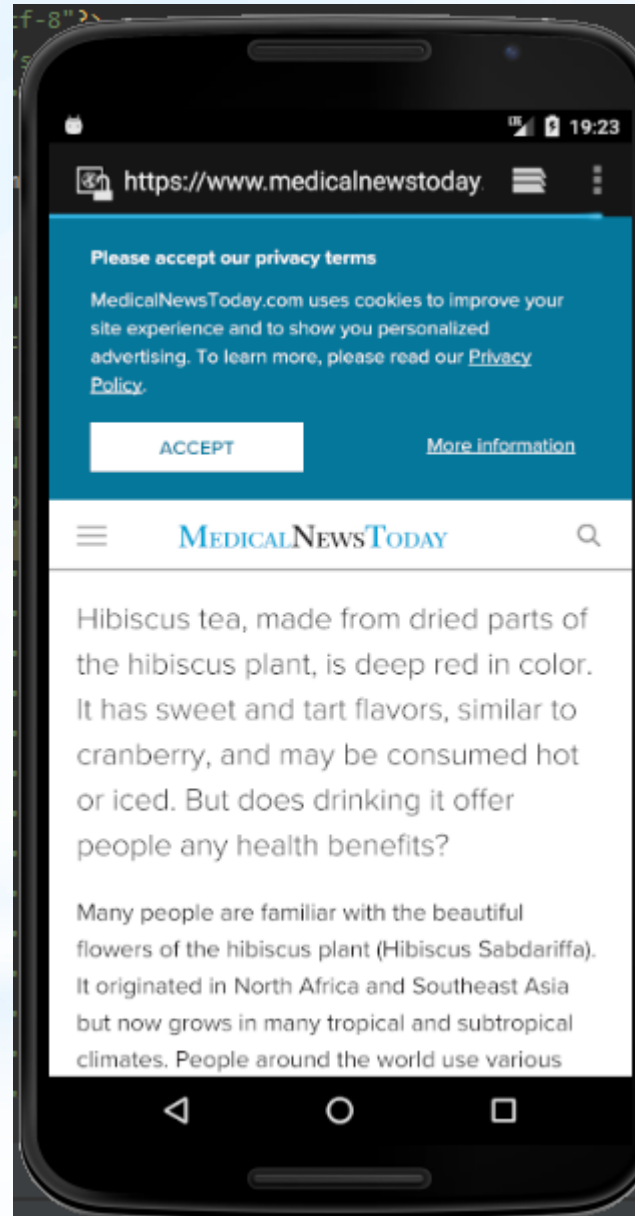

On clicking the button "LIST OF PRODUCTS" , we get directed to the new page. The new page provides the list of products for which recipes are available.
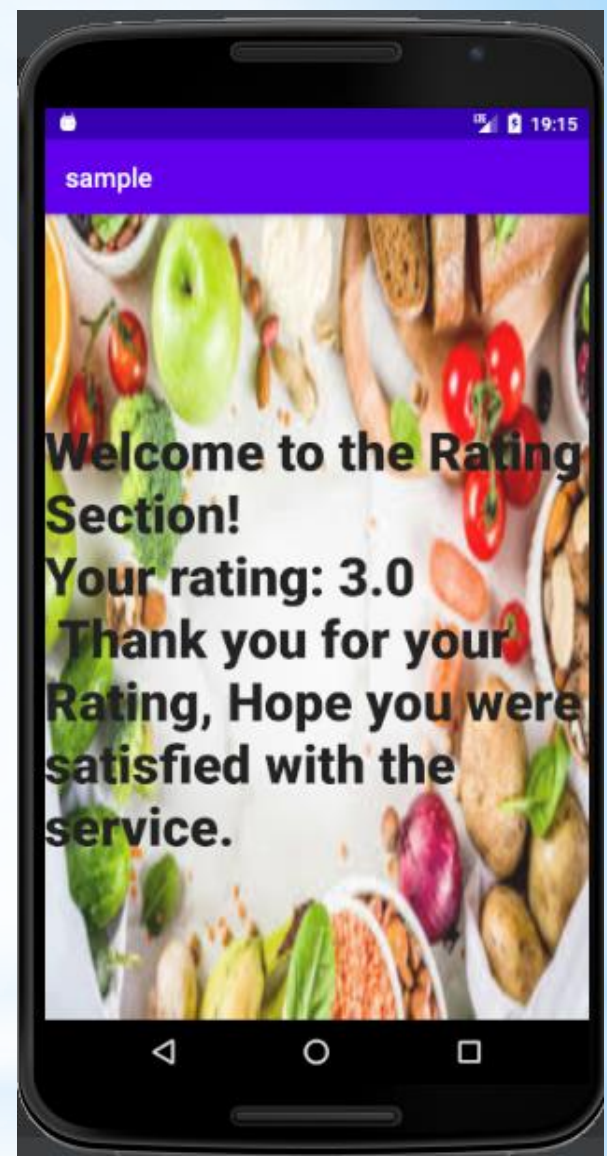

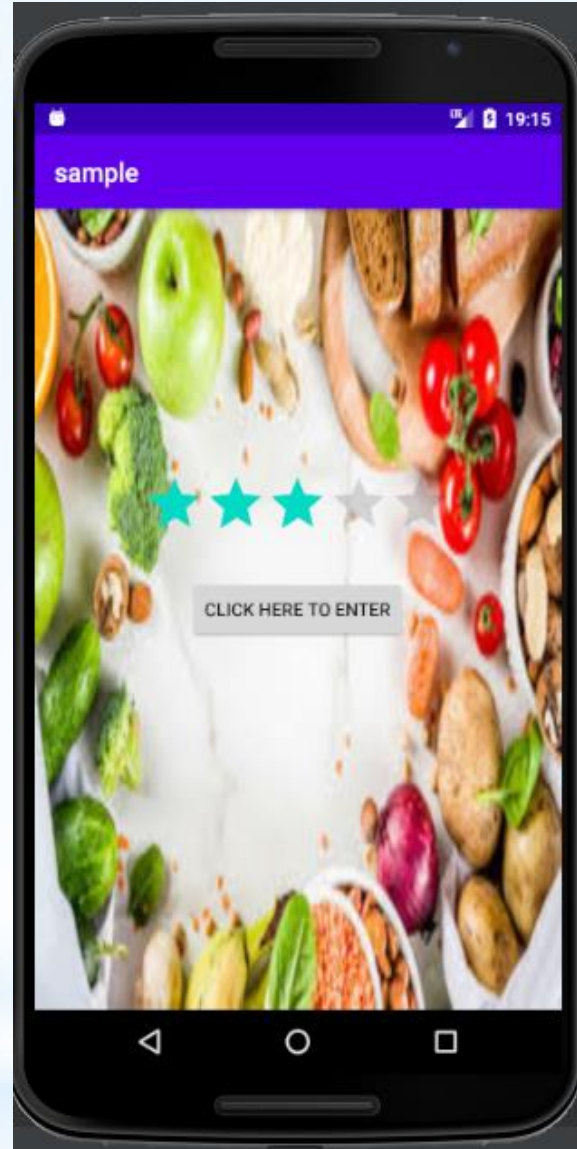

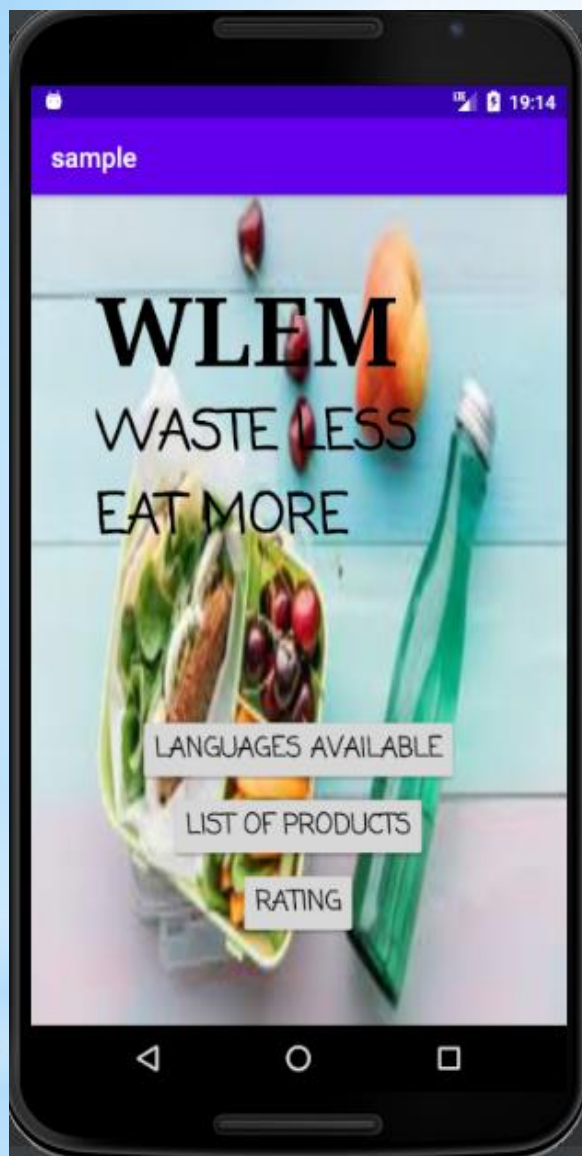

On clicking the button "HIBISCUS", we get directed to the new page. The new page provides the list of recipes available for the respective product.
This process is same for all the products present in the "list of products".

On clicking the "HIBISCUS TEA" button, we get directed to a new page, which consists of the recipe along with a button which on clicking takes us to a respective website link which provides the benefits of the product used/item made. This is the same for all the recipes provided.

On clicking the button "INFO ABOUT HIBISCUS TEA" , we get directed to the website link provided. This page usually provides some information about the product used or about the item made.

On clicking the "RATING" button, we get directed to a new page, which helps the user to provide rating for the app and on clicking "click here to enter" , it directs to a new page which acknowledges the rating provided by the user.
